Diese Farbkarte zeigt **80** Farbtöne für **Ecolith Farben**. Die abgebildeten Farbtöne sind über das maschinelle Farbmischsystem **COLOURS FOR LIFE** erhältlich und dienen als Orientierungshilfe für die Farbauswahl. Maßgeblich für die Farbtondarstellung ist **immer** unser **COLOURS FOR LIFE** Farbtonfächer.

Die Ecolith-Farbtöne sind in **4 Preisgruppen** eingeteilt, die sich durch die Farbauswahl und Farbintensität ergeben. Unter jeder Farbtondarstellung finden Sie daher die Preisgruppenangabe P1 bis P4 sowie die Seitenzahl im Farbtonfächer zur besseren Auffindbarkeit. Ihr Fachhändler hält die aktuelle Preisliste bereit.

Vor großflächiger Verarbeitung empfehlen wir Probeflächen anzulegen. Bitte achten Sie beim Kauf auf **einheitliche Chargennummern**. Kalkhaltige Produkte können eine nicht vollständig gleichmäßige, wolkige Oberfläche ergeben. Beachten Sie unsere aktuellen Technischen Merkblätter auf unserer Homepage www.auro.de.

This colour chart shows **80** shades of **Ecolith paints**. The displayed colours serve as a guide for the colour selection and are available via the colour mixing system **COLOURS FOR LIFE**. For the definitive presentation of colour shades, please refer **always** to our **COLOURS FOR LIFE** colour tone fan.

The prices for the Ecolith colour tones are divided into **4 price groups**, the actual price depending on the intensity of the selected colour shade. Therefore, every paint shade is accompanied by an indication of its price group, from P1 to P4 and the page number in the colour tone fan to make it easier to find. Ask your stockist for the latest price list.

We recommend to paint a small test area first before large-scale application. Please make sure to buy products from the **same production batch**. Lime products can bring forth surfaces with a slightly irregular, „cloudy“ appearance. Observe our Technical Data Sheets on www.auro.de/en.

Cette carte de coloris montre des **80** nuances de **peintures Ecolith**. Les couleurs montrées peuvent servir d'orientation pour le choix de teintes. Ils sont disponibles au moyen de système de mélange des couleurs automatique **COLOURS FOR LIFE**. Notre nuancier **COLOURS FOR LIFE** est **toujours** déterminant pour la représentation des couleurs.

Les teintes Ecolith sont répartis en **4 groupes** de prix selon l'intensité de la couleur choisie. Sous chaque représentation de teinte, vous trouverez donc l'indication du groupe de prix P1 à P4 ainsi que le numéro de page dans le nuancier pour une meilleure recherche. Votre revendeur tient la liste de prix actuelle à portée de main.

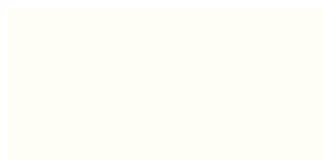

Nous recommandons d'effectuer un essai sur un endroit peu visible avant d'appliquer le produit sur de grandes surfaces. Travaillez le plus possible avec un matériau du **même numéro de lot**. Une surface pas complètement uniforme ou un aspect légèrement « nuageux » sont des caractéristiques typiques de la chaux. Observez nos fiches techniques sur www.auro.de/en.
